Credit rating is the symbolic indicator of the current opinion of rating agencies regarding the relative capability of issuer of debt instrument, to service the debt obligations as per contract.

### **Basel III Credit Rating Systems | Request PDF**

Under the Basel II guidelines, banks are allowed to use their own estimated risk parameters for the purpose of calculating regulatory capital. This is known as the internal ratings-based approach to capital requirements for credit risk. Only banks meeting certain minimum conditions, disclosure requirements and approval from their national supervisor are allowed to use this approach in estimating capital for various exposures.
