About mina.zeinali - Cisco Community

A vulnerability in the web-based interface of Cisco Prime Network Registrar (CPNR) could allow an unauthenticated, remote attacker to conduct a cross-site request forgery (CSRF) attack on an affected system. The vulnerability is due to insufficient CSRF protections in the web-based interface. An attacker could exploit this vulnerability by persuading a targeted user, with an active ...

Cisco Prime Network Registrar Cross-Site Request Forgery ...

We upgraded our version of PRIME from 1.4 to 2.2.0 which means a complete rebuild. Is there anyway to get the guest user accounts from PRIME 1.4 via CLI? I'm searching on the web and not getting much info.

Export guest user accounts from PRIME 1... - Cisco Community

A vulnerability in the installation procedure for Cisco Prime Network Software could allow an authenticated, local attacker to elevate their privileges to root privileges. The vulnerability is due to the use of incorrect installation and permission settings for binary files when the affected software is installed on a device.

Cisco Prime Network Privilege Escalation Vulnerability

A vulnerability in the web-based user interface of Cisco Prime Infrastructure (PI) and Evolved Programmable Network Manager (EPNM) could allow an authenticated, remote attacker read and write access to information stored in the affected system as well as perform remote code execution.
