Crashing, Jumping, Falling When a pitch is thrown, the batter swings the bat in a pendulum arc. The point at which the bat makes contact with the ball determines where and how far the ball will travel. If the ball connects too high or too low on the bat, vibrations will reduce the amount of energy transferred between the bat and the ball.

Readworks Answer Sheet Burger Battlesds - Bing

The Chelyabinsk meteor was a little longer than a normal city bus and moved at 50 times the speed of sound. A bus on the street that loses control could slam into a building and kill a few people. A bus flying through space at 50 times the speed of sound could wipe out an entire city.

the meteor 1230 - Eccles Science

Jumping up when you're falling down doesn't mean you're suddenly going up... just down less quickly. The problem is that a human jump is a fairly weak. So the amount of velocity on our jumps are usually pretty slow.
