Avoid engine damage from the timing belt breaking or slipping, or the tensioner pulley or idler pulley locking up (seizing) or the timing belt skipping one or more cogs on a sprocket causing valve timing problems and possibly breaking valves, pistons and/or the engine cylinder (block).. Change the timing belt, timing belt tensioner and its idler pulley.

How to Change the Timing Belt on a 2.0L, 4 Cylinder Mazda ...

I need to replace the valve stem seals but I don't want to take the head off since the engine is running strong and compression is 180 at all 4, just smokes badly on startup and when cold. Is it possible to replace the seals with the head on the engine? If I put cylinder 1 at TDC, would the valves for 1 and 4 stay where they should be or is the piston, valve gap big enough and they will fall ...
